

CT DIABETIC PATIENT INSTRUCTIONS

If you are taking any of the following medications:

Glucophage	Janumet XR
Glucophage XR	Metformin
Glucovance	Metaglip
Avandamet	Riomet
Fortmet	Janumet
ActoPlus Met	ActoPlus Met XR
Glumetza	Prandimet
Kombiglyze	Jentadueto
Diabex	Invokamet
Diaformin	Kazano
Synjardy	Xigduo

It is recommended patients not take any of the above medications for 48 hours **after** the CT scan.

You will need to contact your primary care physician (**the one who manages your diabetes**) to see if you can be off the medication for 48 hours after being injected with IV contrast.

Drink plenty of fluids during this time.

If you come for your CT scan and you have not contacted your primary care physician, then we may have to reschedule your appointment.

REMEMBER TO CONTACT YOUR PRIMARY CARE PHYSICIAN TO SEE IF OK FOR YOU TO STOP TAKING THE DIABETIC MEDICINE FOR THE UPCOMING CT SCAN.
